

GERI-CARE ZINC SULFATE TABLETS – UPDATED LABEL

Geri-Care product #865 has always contained 50mg of elemental zinc. This amount is listed in the Supplement Facts and it has not changed.

The current Geri-Care label lists the amount of the Zinc Sulfate (the source of the zinc) on the front of the label. Therefore, the label says, “Zinc Sulfate 220 mg”.

Geri-Care has now updated the label for the Zinc supplement tablets to reflect the new FDA guidelines for Supplement Facts. At this time, we have also adjusted our PDP to lists the amount of elemental zinc in the tablets, so the front of the label matches the Supplement Facts. Therefore, the PDP of the updated label says, “Zinc 50 mg”.

Current Label

Supplement Facts		
Serving Size 1 Tablet		
	Amount Per Tablet	% Daily Value
Zinc (Zinc Sulfate Heptahydrate)	50 mg	333%

This product contains 220 mg of zinc sulfate heptahydrate, which provides 50 mg of elemental zinc.

Updated Label

Supplement Facts		
Serving Size 1 Tablet		
	Amount Per Tablet	% Daily Value
Zinc (Zinc Sulfate)	50 mg	455%

This product provides 50 mg of elemental zinc in the form of zinc sulfate.

Note: As part of the changes that the FDA made for the new Supplement Facts, they reduced the daily recommended amount of zinc from 15mg to 11mg. Therefore %DV of the Zinc 50mg tablets increased from 333% to 455% even though the amount of zinc in the tablets remained the same.
